CAREER OBJECTIVE

B.E. Information Technology student (Honors with Research) at VESIT Mumbai, CGPA 8.78. Automation-focused with hands-on experience building business workflows, WhatsApp automations, and API integrations. Experienced in n8n, REST APIs, webhooks, and Python-based automation through freelance projects and software internships. Interested in building reliable, end-to-end automation systems that reduce manual work and improve business operations.

TECHNICAL SKILLS

Automation: n8n, LangChain, workflow automation, WhatsApp automation, OCR automation
APIs and Integrations: REST APIs, webhooks, Postman, CRM sync and lead routing (project experience)
Programming: Python, Java, JavaScript, Node.js, Express.js, MERN Stack, Flutter
AI and Data: Machine Learning, NLP, OpenCV, PyTesseract, MongoDB
Tools: Git, GitHub, Canva

WORK EXPERIENCE

Freelance Developer – Websites and Business Automation

- Delivered 6+ freelance projects: websites, WhatsApp automation and business process automation.
- Built each solution to the client's requirements. Clients include Sadla Beauty.

Palcoa Solutions Dec 2024 – Apr 2025
Software Intern

- Built OCR automation with Python, OpenCV and PyTesseract to extract text from images.
- Reduced image processing time with better data structures. Wrote module documentation and onboarding guides.

Zemo – Sports Reconnect May 2025 – Aug 2025
Software Intern

- Built a sports fixture generator with scheduling logic. Reduced manual effort in tournament planning.

PROJECTS

RevenueOps Autopilot – Lead Operations Platform

- Validates and deduplicates inbound leads, then routes them to owners with follow-up tasks.
- Scores leads with AI using schema-validated output and a human approval step.
- Flags runs where the business outcome is missing. Adds safe retries and audit logs.

ResQLink – Disaster Response and Logistics Platform
Flutter, BLE, GPS, Node.js, Express.js, MongoDB

- Offline-first app with Bluetooth Low Energy messaging, sensor-based hazard detection and crowdsourced disaster maps.
- Designed a logistics module that ranks SOS requests by urgency and recommends rescue routes.

ReClaim – Material Reuse Platform for Circular Campuses: designed a Material Passport and an Innovation Readiness Score to rate material recovery opportunities. *AI/ML, web development, data analytics*

Kisan Wani – Voice Assistant for Farmers: voice-first Hindi assistant for crop information, schemes and predictions, built for users with limited digital literacy. *NLP, speech processing*

RESEARCH PROJECTS

Project Helix – DNA-Based Medical Data Storage (Honors with Research): encodes medical records into synthetic DNA sequences and decodes them with error correction. Journal publication planned. *Python, data compression, cryptography*

Breast Cancer Detection and Treatment Decision Support: analyses diagnostic data to suggest treatment options for clinicians. Journal publication in preparation. *Machine learning*

ACHIEVEMENTS AND LEADERSHIP

- **Hackathons:** participated in 45+, finalist in 13, winner in 3 (Hackcelestial Panvel, Nexothon Gujarat, Hackverse PCCOE).
- **SE Coordinator and NGO Volunteer:** organised technical events and hackathons. Taught students and women in community programmes.
